

# Benefits of Silicone Antifoam

## Use less and save

- Silicone antifoams are **effective at very low usage levels**
- Silicones tend to be **inert and less reactive with the other process components** than other types of antifoams
- **Exceptional at lowering the surface tension** of the foaming medium
- **Persistent and long lasting** foam suppression

## TRANS-290

### Industrial Grade Specialty Silicone Antifoam

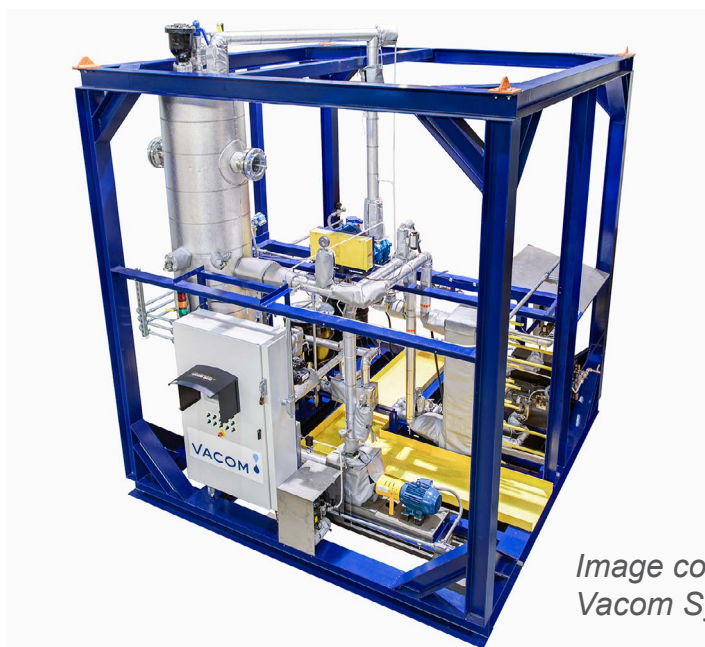

- **Versatile**—Effective in a wide variety of applications, including evaporative wastewater treatment and detergents
- **Fast acting**—Mixture of silicones and non-silicone active ingredients provide rapid and aggressive foam destruction
- **Easy to use**—Readily dispersible in water with gentle mixing

## Do You Need an Antifoam for Your Wastewater Evaporators?

- Used in the metal working industry where oils and fluids can foam in the unit
- Effective with on-site oil field waste recycling and flowback water
- Excellent for landfill leachate
- Controls foam in complex wastewaters, including chemical plant effluent
